April 26, 2025

Ansa Biotechnologies, a nucleic acid synthesis provider and member of the International Gene Synthesis Consortium, attests that it is compliant with and adheres to all requirements in the U.S. Office of Science and Technology Policy (OSTP) Framework for Nucleic Acid Synthesis Screening.

Ansa implements the following biosecurity and information security practices, as specified in the Framework:

- Screening purchase orders for synthetic nucleic acids to identify sequences of concern (SOCs)
- Screening customers submitting purchase orders of synthetic nucleic acids with SOCs to verify legitimacy
- Reporting potentially illegitimate purchase orders of synthetic nucleic acids involving SOCs to relevant authorities
- Retaining records relating to the purchase of synthetic nucleic acids
- Taking steps to ensure cybersecurity and information security

Ansa is committed to satisfying the requirements of the OSTP Framework. Ansa agrees to promptly update this statement should there be any changes to our adherence status.

Signed,

Jason T. Gammack
Chief Executive Officer
Ansa Biotechnologies
